

Milestone #7
NetBSD Wifi Browser Project 2022
Dylan Roy, Stephen Loudiana, Kevin McGrane

1 General Progress Report

Progress within Surf was fairly minimal this milestone. Being that it is functionally complete, little tasks are being performed to improve it in small ways. Along with this, the Makefiles were converted to BSDMake.

Accomplishments

- Surf listing output has been improved
- Makefiles converted to BSDMake

Targets Not Met:

-

2 Git Branch Report

A branch, `TUI_test` was made to begin implementation of the TUI.

3 Individual Progress

Kevin:

-

Dylan: 4 hours, 5 minutes

- Improve the output for Surf's listing functions
- Moved the testing files for Surf into the dedicated test directory
- Added a testing script to automate Surf testing
- Converted all of Surf's Makefiles into BSDMake
- Modified Surf's error output to only print when `DEBUG` flag set at compile time → might send to a log alternatively

Stephen:
